✕

Learn Git and GitHub without any code!

Using the Hello World guide, you'll start a branch, write comments, and open a pull request.

Read the guide

🔒 denisarcolinux / **cheatsheet** Private

Quick setup — if you've done this kind of thing before

or **HTTPS** **SSH** `https://github.com/denisarcolinux/cheatsheet.git`

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

…or create a new repository on the command line

```
echo "# cheatsheet" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/denisarcolinux/cheatsheet.git
git push -u origin master
```

…or push an existing repository from the command line

```
git remote add origin https://github.com/denisarcolinux/cheatsheet.git
git push -u origin master
```

…or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Import code

💡 **ProTip!** Use the URL for this page when adding GitHub as a remote.
